

# INFORMATIK-SONDER-KOLLOQUIUM

Einladung zum Vortrag von

**Prof. D. T. Lee**

(Institute of Information Science & Research Center for IT Innovation,  
Academia Sinica, Taiwan)

## „Algorithms for Sequence Finding and Selection Problems“

In this talk we present algorithms for solving problems related to sequence manipulation, including searching subsequences of maximum density and selecting subsequences of a certain density, of a given rank, with or without length restrictions. Problem transformation and utilization of efficient data structures or problem-solving methods will be presented. The problem-solving methods are fundamental to computational problems, which arise, for example, in bioinformatics.

(Joint work with Dr. Tien-Ching Lin, Institute of Information Science, Academia Sinica, Taiwan.)

**Zeit:** Donnerstag, 28. Mai 2009, 11:30 Uhr  
**Ort:** Raum SR 301, Informatik-Hauptgebäude (Geb. 50.34)  
Am Fasanengarten 5, 76131 Karlsruhe

**Die Dozenten der Informatik**
